A Message from the President

by Nancy Latimer, PhD, RRT

It's been another exciting and productive year at the Lambda Beta Society. We have made tremendous growth in our organization, and we would like to welcome the eight new chapters and 464 new members that have joined since January 2023. New to our website, you will find promotional videos that can be shared with your students, faculty, administrators, and business partners.

Additionally, it's that time of year when we announce our scholarship winners. We had record numbers apply for each category and I would like to thank the Board Members for their time in reviewing over a hundred applicants. Congratulations to the H. Frederic Helmholtz, Jr., MD Scholarship winner, Amber Cox, to the NBRC Leadership scholarship winner, Melody Kloepfer, to the Stephen P. Mikles, EdD, RRT, FAARC

Media Award winner, Charmaine Towns, and to the Brad Leidich Memorial Scholarship winner, Jessica Bradley. Cheers again to a job well done.

In this issue of our newsletter, you will be introduced to our newest Board Members Nicholas Henry from Texas State University and Sherry Whiteman from Missouri Southern State University both of whom come to us with a wealth of experience. Unfortunately, we must say goodbye to our outgoing Board Member, Sindee Karpel, after seven years of service and dedication to our board and the respiratory care profession. The Lambda Beta board would like to give a big congratulations to this year's Lambda Beta Honorary Member Kim Hill, MS, RRT, RRT-NPS, RPFT, for her sustained, superior, performance in the respiratory care profession. Kim, in addition to her extensive educator and scholarly contributions, has been an avid leader and supporter of the Lambda Beta Society since 1996 and served as President three times throughout her tenure. Finally, I hope you enjoy a fabulous article by Kim Hill discussing the Opportunities for Respiratory Therapists in Simulation Education.

Our 2023 Scholarship/Award Winners

The Lambda Beta Society is excited to announce the 2023 Scholarship and Awards winners below. These students exemplify hard work and passion for the respiratory care profession. Congratulations to all of you!

\$2,000 NBRC Leadership Award

Melody Kloepfer
Nova Southeastern University
Davie, FL

"I am honored to be nominated for the NBRC Leadership Award. The award allows me to pay back some of my school expenses. I am also grateful for my strong support system which permits me the opportunity to volunteer, help others, and pursue my passion for the cardiopulmonary system. Lastly, I am grateful for the privilege and honor to help others along my RRT journey."

\$2,000 Brad Leidich Memorial Scholarship

Jessica Bradley
Wallace Community College
Dothan, AL

"I am writing to express my sincere gratitude to all of you for making me the 2023 Brad Leidich Memorial Scholarship recipient. I have been absolutely thrilled since learning of my selection for this great honor from your esteemed organization. Words cannot express how much I am deeply appreciative of your support in my academic achievements."

I am currently attending Wallace Community College to obtain an Associate's in Respiratory Therapy with the ultimate goal of becoming an Advance Practice Respiratory Therapist. I am on track to graduate this upcoming May, and because of this generous investment in my educational future, I will be taking my board exams and transferring to Jacksonville State University.

By choosing me as the recipient of the 2023 Brad Leidich Memorial Scholarship, you have lightened my financial burden which allows me to focus more on the most important aspects of school, learning, and earn the potential to save patients' lives. Your generosity has inspired me to continue to work hard and go above and beyond for not only my own education, but for my peers as well. I want to make a promise to you all that I will continue to work hard and be an advocate to give back to the organization that has given me so much."

Our 2023 Scholarship/Award Winners (cont.)

\$2,000 CoARC Stephen P. Mikles, EdD, RRT, FAARC Media Award

Charmaine Towns
Rush University
Chicago, IL

"I would like to extend a big thank you to everyone who was involved in my being chosen for this award. I appreciate everyone taking the time to review my submission. I am humbled in being chosen. While the submission was originally created for a research project, it took my mentor to convince me that it was good enough to receive a scholarship. As a graduate student, you're always wondering if you're doing something correctly. You are told that you are good enough - some times, it can be hard to believe. Winning this scholarship let's me know that I am good enough. I grew up without anyone pushing me to make my education a priority and telling me all of the good things I could do, the difference I can make in the world. It's been difficult trying to tear down stereotypes, break through barriers and push on without someone encouraging you. I've worked so hard to get where I am. I am so grateful that my hard work is beginning to show. I thank CoARC for sponsoring this scholarship and recognizing people like myself, who came from nothing, and are giving everything they have into trying to make a difference in this world. Being the recipient of this award means the world. Thank you for choosing me to be the recipient."

\$2,500 H. Frederic Helmholtz, Jr., MD Scholarship

Amber Cox
Nebraska Methodist College
Omaha, NE

"I am honored to be selected as the recipient of the 2023 H. Frederic Helmholtz, Jr., MD Scholarship. This scholarship contributes to my pursuit of respiratory therapy education and bolsters my passion for respiratory care in the pediatric population. I am truly moved by this recognition, and this will continue to inspire the rest of my career in respiratory therapy."

Opportunities for Respiratory Therapists in Simulation Education

by Kim Valeri Hill, MS, RRT
Simulation Lab Coordinator

As I reflect on my career as a respiratory therapist, I have had the opportunity to work with a diverse group of colleagues and friends, including fellow staff respiratory therapists, nurses, and physicians whom I encountered from the time I held my first job as a graduate respiratory therapist in a hospital, through my long career in respiratory therapy education.

I am now in a unique position with the University of Georgia. Currently, I am the Coordinator for the Simulation Center at the Augusta University/University of Georgia (AU/UGA) Medical Partnership located on the University of Georgia Health Science Campus in Athens, GA. The Partnership is a consortium between the University of Georgia and the Medical College of Georgia of Augusta University. This consortium has brought together the best instructional, clinical, and research resources of both universities to provide medical education in Athens. The UGA Health Science Campus is relatively new to the University of Georgia and was created 12 years ago when the University acquired a former US Naval Supply Corps School property in Athens. Plans for this new campus included an initial 40-student-per-year class of medical students to increase opportunities for medical education in the University System of Georgia while allowing for smaller class sizes. The Health Science Campus also houses undergraduate and graduate programs in public health and includes classrooms, research laboratories, student residences, administrative offices, dining services, and a daycare center.

Cohort sizes for the medical students were planned to increase first to 50 per year and then to our current maximum of 60 students per year. With this new location for the Partnership came a Simulation Center. While smaller in comparison to many larger medical college simulation centers, what started out as a 1-room simulation lab has now expanded to a five-bay simulation center that can accommodate our growing class size and the needs of the many clinical experiences the students are exposed to in medical education.

We currently have eight high-fidelity simulation manikins which include five adult patients, one pediatric patient, one infant, and one newborn. We use both Laerdal® and Gaumard® brands of simulators based on our specific needs for cases and scenarios. For example, we chose the Gaumard® simulator for the capability of OB/GYN exams and newborn delivery. The Control Room provides monitoring of all five simulation bays with audio and video recording that connects directly to the simulation bays.

Many simulation centers located in medical education also provide experiences for students in nursing, respiratory care, and other allied health programs. As respiratory therapists, we can bring a unique blend of experience and expertise to the field of simulation. Respiratory therapists are highly trained in the use of technically sophisticated equipment, such as non-invasive and invasive mechanical ventilators, airway devices, monitoring devices, and diagnostic instruments. With this experience and technical ability, we can bring another level of sophistication to simulation training. Not only can we easily learn the mechanics of high-fidelity manikins and the associated software, but we can apply our experience as caregivers to simulation scenarios. Furthermore, a respiratory care educator can bring knowledge of problem-based learning, clinical simulation scenarios, testing, and measurement to name only a few.

Opportunities for Respiratory Therapists in Simulation Education (cont.)

While my current position in simulation is primarily in an administrative support role, I have been allowed the unique opportunity to offer input on new simulation cases, participate in “pilot simulations” in the role of a medical student, and provide instruction on oxygen therapy and airway management in both the classroom and laboratory settings. While many of the simulation cases in medical education focus on a broader spectrum of care, I believe respiratory therapists, and especially respiratory therapy educators can advance the scope of training to include not only oxygen therapy and airway management but mechanical ventilation, critical care rotations, hemodynamic monitoring, non-invasive positive pressure ventilation, and other special diagnostic procedures. My involvement with the medical students has also provided an excellent opportunity for me to demonstrate what a respiratory therapist does in the clinical setting, and how the therapist can be a valuable resource as they begin their careers in medicine.

If you are looking for a change in your career path, or a chance to expand your opportunities, consider a position in a simulation center. This offers an excellent avenue for respiratory therapists to bring our clinical and educational knowledge to the simulation environment. Several options may be available to respiratory therapists to pursue an alternative career path while still supporting and contributing to the profession. Simulation centers typically have simulation coordinators who handle all the scheduling in the simulation center, ordering the appropriate equipment, interacting with the students as they attend encounters and curriculum planning. Simulation technicians prepare the patient rooms for every type of encounter in the labs which includes the use and training of high-fidelity simulation manikins, patient scenarios, laboratory exercises, moulage applications, and software support.

Respiratory therapists are also eligible to earn credentials in the field of simulation. This is an opportunity to receive formal recognition in specialized areas of simulation education and includes Certified Healthcare Simulation Educator® (CHSE®) and Certified Healthcare Simulation Operations Specialist® (CHSOS®). Advanced-level credentials are also available. With the growing field of simulation education, you may find a new direction for your career while maintaining your expertise as a respiratory therapist and combining it with simulation education and operations.

For more information on Simulation in Healthcare, contact the Society for Simulation in Healthcare (SSH®) at ssih.org.

Farewell to Lambda Beta Board Member Sindee Karpel, MPA, RRT, AE-C

The Lambda Beta Society would like to issue a BIG thank you to outgoing Board Member, Sindee Karpel, MPA, RRT, AE-C. Sindee joined the Lambda Beta Executive Board in 2016. After many years, Sindee has decided to retire from the Board and her teaching position at Florida South Western State College. Sindee began her career as a respiratory therapist in 1980 at Queens Hospital Center, Jamaica, NY. She has served on numerous professional Boards in leadership positions throughout her career in both New York and Florida. Additionally, she has contributed to the profession through countless hours of community service, abundant publications, and presentations at both state and national organizations. Thank you for your years of service and dedication to our Board and the respiratory care profession. Your contributions of ideas and enthusiasm have been invaluable.

Welcome to New Board Members

Nicholas Henry, PhD, RRT-ACCS, RRT-NPS, AE-C, is an Associate Professor and Director of Clinical Education for the Department of Respiratory Care at Texas State University. He is also an affiliate faculty in the Department of Internal Medicine at Dell Medical School. Henry has been active in publications and his research focuses on organ donation, critical care respiratory therapy, and continuing medical education. He is an advisory board member for the Texas Organ Sharing Alliance.

Sherry Whiteman, EdD, RRT, is the Graduate Program Coordinator and Assistant Professor of Healthcare Administration at Missouri Southern State University (MSSU). Dr. Whiteman earned her A.S. in Respiratory Therapy and B.S. in Health Science at MSSU in 2007. She worked full-time in the field with a focus on adult critical care for several years before returning to her alma mater as a Clinical Instructor for the Respiratory Therapy Program. Dr. Whiteman earned her M.S. in Career and Technology Education Leadership from the University of Central Missouri in 2015 and an Ed.D. in Higher Education Leadership in 2021. Dr. Whiteman served as Program Director for the Respiratory Care Program for two years before transitioning to Healthcare Administration in July 2023. Dr. Whiteman enjoys reading, running, playing video games with her son, camping with her husband and son, and spending time with friends.

2023 NATIONAL HONORARY MEMBER

Kim Hill, MS, RRT

Each year, the Lambda Beta Society honors one individual with National Honorary Membership. This honor is reserved for an individual who has made an outstanding contribution nationally to the progress and/or development of the art, science, literature or public understanding of respiratory care. National Honorary Members can be nominated by any member or chapter.

As I reflect on my career in respiratory care, I have been fortunate to work with some of the best individuals in the areas of clinical practice, education, and research including my involvement with the Lambda Beta Society. I express my sincere gratitude for the impact the persons who not only shaped and molded my career but gave me the inspiration and courage to succeed. While the list of these role models is far too long to include everyone, there are a few I'd like to recognize. Dr. George Burton, Dr. Thomas Howdieshell, Dr. Shelley Mishoe, RRT, Dabney Edison, BS, RRT-NPS, Dr. Henry Oh, RRT, Vijay Deshpande, MS, RRT, and all the members of the Lambda Beta Board.

I am honored to be selected as the 2023 recipient of the National Honorary Member of the Lambda Beta Society. I thank all the Lambda Beta Board Members both past and present for selecting me for this award. It is truly an honor to join the list of distinguished individuals who have also been honored. When Dr. Shelley Mishoe nominated me to serve on the Lambda Beta Board over 25 years ago, I never imagined I'd receive such an honor. This is truly one of the most significant events of my professional career and a memorable day in my life.

I served on the Lambda Board of Directors from 1996 to 2020 in different positions from an at-large member to president. During this time frame, I met and interacted with not only

the Lambda Beta Board Members but also the staff of the NBRC and the CoARC as well. This has allowed me to experience many different levels of being a board member and representative of the National Honor Society for Respiratory Care. I was inspired to join the Board of Lambda Beta as a new faculty member not only to learn and function on a professional board but also to serve in a volunteer capacity that could further the progress and recognition of the field of respiratory care. Once I was involved, I truly found the opportunity to give back and pay it forward. I have developed a profound commitment to Lambda Beta that continues to this day. Over the years I have been able to witness the growth and advancement Lambda Beta has achieved and am happy to have been a small part in that progress.

When the Lambda Beta Society was initially formed, the founding board members chose the Greek letters (Λ) Lambda and (Β) Beta to represent Life and Breath for all mankind. I encourage everyone to find your passion not only personally but professionally and give it the "Life and Breath" that your vocation deserves. It can take you places that you never imagined were possible. This is what the Lambda Beta Society National Honorary Award means to me.

Finally, I'd like to thank my husband Dr. Thomas V. Hill for all his encouragement and support. Without Tom, this award would not have been possible.

I'd like to conclude with a quotation from Eleanor Roosevelt: "For our own success to be real, it must contribute to the success of others."

THANK YOU SPONSORS!

Visit the NBRC and Lambda Beta at AARC Congress 2023

The NBRC and Lambda Beta are going to Nashville for the 2023 AARC Congress! Expect a brand new booth and some complimentary swag for attendees. All meetings will be held at the **Gaylord Opryland Resort & Convention Center**. There are nine acres of indoor garden atriums, restaurants, a waterpark, 18-hole golf course, plus a spa and fitness center. The resort is located near Nashville International Airport, downtown, and offers attractions like the Grand Ole Opry and Ryman Auditorium.

Nashville, TN

Gaylord Opryland Resort & Convention Center
November 5 - 8
